PROFILE SUMMARY

- Data Science student with strong foundation in programming, algorithms, database management, and big data technologies.
- Skilled in Python, SQL, and data engineering tools including Apache Spark, Kafka, and Docker.
- Experienced in building end-to-end data pipelines, ML models, and interactive dashboards.
- Passionate about applying AI and data science to real-world problems and driving data-driven decision-making.

EDUCATION

Bachelor of Science in Data Science — University of Central Punjab (UCP), Lahore • 7th Semester

Relevant Coursework: Data Structures • Algorithms • Database Management • Data Analysis • Big Data • Machine Learning

TECHNICAL SKILLS

Languages: Python, SQL, C++, JavaScript, Solidity

Data & AI: Pandas, NumPy, Apache Spark, Kafka, Scikit-Learn, XGBoost, Hugging Face, LangChain

Frameworks & Tools: React, Flask, FastAPI, Streamlit, Docker, Git, Airflow, n8n, PostgreSQL

Blockchain: Ethereum, Web3.js, Truffle, Solidity

PROJECTS

PakDeals Finder | Python, Flask, React, LangGraph, Groq, BeautifulSoup [\[GitHub\]](#)

AI-powered deal aggregator that scrapes, analyzes, and ranks deals across 4 e-commerce platforms (Daraz, Telemart, iShopping, Shophive) using a multi-agent AI pipeline with LLM-powered analysis and ranking.

Healthcare Pulse | React, Flask, Apache Spark, PostgreSQL, Docker [\[GitHub\]](#)

Disease surveillance and forecast dashboard with distributed processing pipeline for real-time health data analytics and visualization.

Opportunity Dashboard | Streamlit, PostgreSQL, Docker, Plotly [\[GitHub\]](#)

Internship and job opportunity management platform with full CRUD operations, interactive analytics, CSV import, and Dockerized deployment.

BDA Opinion Mining | Kafka, PySpark, Hugging Face, React, Docker [\[GitHub\]](#)

Real-time opinion mining pipeline for streaming sentiment analysis using Kafka for stream processing, PySpark for distributed computation, and Hugging Face transformer models with a React dashboard.

Job Market Analytics Pipeline | Airflow, KNIME, n8n, Flask, Docker [\[GitHub\]](#)

End-to-end data pipeline for job market intelligence integrating Airflow orchestration, KNIME ETL, n8n automation, and a Flask-based visualization layer.

CERTIFICATIONS

- Programming Fundamentals (Online Platforms)
- Introduction to Data Analysis (Coursera)
